Project Manager (Turnkey)

RFX Management: RFP/RFQ: To support the business manager in getting all the inputs related to procurement, Tendering, Sales departments. For critical and important RFP the PM has to go to the site to work out the details.

SOP for RFX evaluation: To strictly follow the SOP for the “RFX Evaluation” and abide by the templates, documents and SLAs (Service Level Agreement) for receiving the data and submitting the proposal and pricing for team's review.

Proposal: To participate in the proposal review and make sure that all the inputs provided by above mentioned cross-functional departments are included exactly.

Support the commercial negotiations: Support the Business team manager during the various rounds of commercial negotiations with the customers. Derive a full cost structure and proposal to be shared with the customer.

Support internal: To support / coordinate to obtain the SO number generation once project get awarded in stipulated time period. Vendor Management and finalization.

Project take-over once the project comes: After the project win, complete the hand-over of the complete project details, documents and templates from business manager with proper justifications for all the key assumptions made in the pricing and proposal.

Proposal for scope change management: To support the Business team to carry out the proposal preparation activities for the “new scope” discussed and agreed with the clients (following all the above steps).

Project Execution: For awarded projects,

- Constitute the project team in consultation with various departments and organize kick off meeting (with customer or internally) to inform everyone about the objectives, scope, deliverables and timeline of the project. Weekly mail communication and bi weekly telecom

- Organize and coordinate the periodic weekly reports and teleconferences/Zoom also site visits with the customers for ongoing projects.
- Monitor the project activities starting from procurement till delivery.
